About me

With 8 years of product and software development experience, I bring customer-oriented features to your product. Using my great drive to quickly learn existing and new technologies. Where mastering these technologies is something I love doing!

I have hands-on experience with the following technologies & languages: Linux, JavaScript, NodeJS, PHP, TypeScript, Perl, Ruby, macOS, Docker, Kubernetes, Proxmox VE, Laravel, React, React Native, NextJS, NestJS, AWS, VueJS, PostgreSQL, MySQL, Git, Mercurial, CondoVA.

Employment history

Frontend Developer at Australian War Memorial

Employment: March 2021 - September 2021 (contract period)

The Australian War Memorial is Australia's national memorial to the members of its armed forces and supporting organisations who have died or participated in wars involving the Commonwealth of Australia and some conflicts involving personnel from the Australian colonies prior to Federation.

Responsibilities:

- Co-design online exhibitions
- Design & develop transcription tools for images, video and audio.
- Create a foundation to easily create online exhibitions for the public.

Technologies:

- JavaScript (NodeJS, React, NextJS, Framer Motion, KonvaJS)
- CSS (PostCSS, TailwindCSS)
- Github (Git, Contributing to Open Source)
- Hosting (AWS, Amplify, Machine Learning)

Achievements:

- Working closely with designers to create exciting exhibitions.
- Using machine learning to aid with transcription of multimedia.
- Mastering React to a level I can teach people React.

Senior Software Developer at StoreKeeper Company B.V.

Employment: July 2018 - December 2020

StoreKeeper B.V. is an eCommerce company based in the netherlands. They build SAAS commerce solutions ranging from webshops to POS systems in the store. Because it was a small team, everyone knows and works on the full stack.

Responsibilities:

- Design and develop new features
- Design and implement devOps tools (CI/CD)
- Guiding new and junior developers
- Simplify complex UI

Technologies:

- JavaScript/ TypeScript (NodeJS, React, React Native, Backbone)
- PHP (Laravel / Symfony / In house framework)
- PostgreSQL / MySQL
- Git / Mercurial
- Linux server management

Achievements:

- Design and deploy a cash register with full hardware integration

Software Developer at Upx Systems B.V.

Employment: August 2015 - July 2018

Upx Systems B.V. was a company that developed custom solutions for their customers. Here I worked as a front-end developer. This company changed to what is now StoreKeeper B.V.

Responsibilities:

- Communicate with the customer
- Design, develop and deliver custom solutions
- Work in a team of developers, designers, marketing
- Estimate features for a customer quote
- Guiding and work with developer interns

Technologies:

- JavaScript (NodeJS, Backbone, Cordova)
- PHP (In house framework)
- Mercurial / Git
- Linux desktop

Achievements:

- Become a professional programmer from a hobbyist programmer.

Trainee Software Developer at Nubium

Internship: January 2015 - July 2015

Nubium is a company that does online marketing and web development. They had their own custom CMS, where they build multiple products on top.

Responsibilities:

- Make their customers websites mobile friendly
- Apply changes to their customers websites

Technologies:

- PHP (In house CMS)
- HTML5 & CSS3
- FTP

Achievements:

- Here I learned that I'm a quick learner, and school was slow paced.

Education**Diploma of Software Development from ROC van Twente**

In class: 2012 - 2015

Once I finished my IT support study, I decided to lean on my interest in programming. Due to my prior knowledge of programming in my own time, this study was boring and repetitive for me. After I graduated with ease and my internship with Nubium, I decided I wanted to learn while working. So I started working full time for Upx Systems B.V.

Diploma of IT support from ROC van Twente

In class: 2010 - 2012

Here I learned everything about IT support, communicating with non-technical people and working with hardware (servers, desktops and laptops). Because of my interest in computers from a young age this was an easy study.
